# Cucchi, i periti: "Morte improvvisa per epilessia"

Author: Amleto Mirto ; Ultimo aggiornamento: 05 Ottobre , 2016 02:46:39

È l'ipotesi "dotata di **maggiore forza ed attendibilità**" adottata dai periti

([http://roma.repubblica.it/cronaca/2016/10/04/news/roma\\_morte\\_cucchi-149092905/?ref=HREA-1](http://roma.repubblica.it/cronaca/2016/10/04/news/roma_morte_cucchi-149092905/?ref=HREA-1)) incaricati dal **gip di Roma** dell'esame tecnico-scientifico per accertare la natura, l'entità e l'effettiva portata delle **lesioni** patite da **Stefano Cucchi**.

Immediato il commento della sorella **Ilaria Cucchi** che su *Facebook* ha scritto: "**Avremo un processo per omicidio**. La prima, per **epilessia**, che se in un primo momento viene ritenuta forse più probabile, nelle conclusioni la si definisce '**priva di riscontri oggettivi**'. Ma più avanti nel rapporto si legge che "Le **lesioni** riportate da **Stefano Cucchi** dopo il 15 ottobre 2009 non possono essere considerate correlabili causalmente o concausalmente, direttamente o indirettamente anche in modo non esclusivo, con l'evento **morte**". A questo, scrivono i **periti**, sarebbe da aggiungere la "**condizione di severa inanizione**", cioè di indebolimento generale, riscontrata su Cucchi.

Nella sostanza i **periti** sostengono che questa dilatazione abnorme della vescica, che avrebbe potuto portare a "**morte improvvisa e inaspettata**" non si sarebbe verificata se il paziente fosse stato correttamente ospedalizzato.

## volo Roma Venezia solo andata

Alitalia Official

A pagina 195 descrive compiutamente "un'intensa stimolazione vagale produce bradicardia giunzionale", che ovviamente è conseguenza delle fratture, e poi della **morte**. E ancora: "**Raffreddo gli entusiasmi** di coloro che si fanno forza di una presunta **morte** per **epilessia** facendo notare che i **periti** non sono nemmeno d'accordo con loro stessi sull'effettiva assunzione della terapia anti epilettica da parte di Stefano, che sarebbe l'elemento centrale per arrivare, a dir loro, a quella **causa di morte**". "Premesso l'estraneità del mio assistito e degli altri appartenenti all'Arma alle **lesioni** che **Stefano Cucchi** aveva e delle quali s'ignorano le **cause**, quanto da noi sostenuto in sede d'incidente probatorio è stato confortato e confermato alla perizia disposta dal gip", è quanto ha dichiarato l'avvocato **Eugenio Pini**, legale di uno dei **carabinieri** indagati. Faccio comunque notare - sottolinea **Ilaria Cucchi** - che non è il giurista **Introna** a definire il nesso causale ma saranno i magistrati della procura ed i giudici. In ogni caso, i dati raccolti dai **periti** "non consentono di formulare certezze sulla (e) **causa** (e) di **morte**".

Con l'assoluzione di medici, infermieri e agenti di **polizia penitenziaria**, il PG collocava dunque il **pestaggio** di Cucchi nel periodo di permanenza sotto la custodia dei **carabinieri** finiti **nell'inchiesta bis**; 3 dei quali accusati di **lesioni personali** e **abuso di autorità**, ed altri due per **falsa testimonianza** finalizzata a coprire le presunte responsabilità dei colleghi.
